Owl

Goat

Otter

Leopard

Monkey

EMERALD PARK

AMUR TIGERS

Colour in our Amur Tiger Bira

DID YOU KNOW?

- Amur tigers are obligate carnivores and can only survive by eating meat.
- They are the rarest Tiger out of the six sub-species.
- The striped pattern on each tiger is unique to that tiger and acts like a fingerprint.
- Tigers are excellent swimmers.

FOOD TANGLE

Different animals have different diets, this helps to prevent competition in nature so, all creatures have enough food availability.

CAN YOU HELP OUR ZOO ANIMALS FIND THEIR FOOD

Monkey

Otter

Leopard

Meerkat

Goat

Meat

Insect

Leaves

Vegetables

Fish

HINT:

- Carnivores only eat meat
- Omnivores eat plants and animals
- Herbivores only eat plant

FOOD TANGLE

Can you now draw our zoo animals' favourite food.

ZOO WORD SEARCH

Can you find the zoo words in the word search?

SUPERHERO'S ADAPTATIONS & SURVIVAL

An adaptation is something special about an animal that helps it to survive. Adaptations can be physical changes (wings) to the animals body or behavioural changes (nocturnal). All animals have adaptations that allow them to survive in their environment.

ACTIVITY

Think of your favourite animal (just 1) and design a superhero based on their adaptations.

Each superhero should have:

1. A cool costume inspired by your animal (what colours might be important to your animal; do they have feathers, fur, or scales?)
2. Choose some super powers inspired by your animals adaptations (does your animal have big teeth, claws or horns? Are they fast?)
3. Choose 1 super weakness inspired by your animal. (Can your animal swim? Do they like being in large or small groups? Do they have an archenemy?)
